## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, drawn to a woodworking machine having fusible member, brake pawl and spring, classified in class 83, subclass 62.1.
  - II. Claims 12-16, drawn to a woodworking machine having a cartridge with at lease one opening sealed by metal or plastic film, classified in class 83, subclass 58.
  - III. Claims 17-19, drawn to a woodworking machine having a cartridge with adjustable positioning braking systems, classified in class 83, subclass 698.11.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups I and II/III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because, for example, the woodworking machine of group I could be used without the adjustable braking position. The subcombination has separate utility such as it could be used without the fusible member and capacitor.

- 3. Inventions of Groups II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the sealed cartridge with at least one opening sealed with plastic or metal film of Group II has separate utility such as it could be used without the brake positioned device of Group III; and conversely, the brake positioning device of Group III could be used without the sealed cartridge of Group II. See MPEP § 806.05(d).
- 4. If the applicant elects Group I then the applicant must further elect between the following groups.
  - A. Claim 2, drawn to a woodworking machine having a cartridge sealed against entry of saw dust, classified in class 83, subclass 58.
  - B. Claims 3-9, drawn to a woodworking machine having fusible member, pawl and spring, classified in class 83, subclass 62.1.
  - C. Claim 10, drawn to a woodworking machine having a control to sense if the cartridge has expired or not, classified in class 83, subclass 72.
  - D. Claim 11, drawn to a woodworking machine having a key structure to ensure proper installation of the cartridge, class 83, subclass 698.11.
- 5. Inventions of Groups A-D are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the sealed cartridge of Group A has separate utility such as it could be used without the cartridge key structure

of Group D; and conversely, the cartridge key structure of Group D could be used without the sealed cartridge of Group A. See MPEP § 806.05(d).

- 6. If the applicant elects Group II then the applicant must further elect between the following groups.
  - Claim 13, drawn to a woodworking machine having a cartridge sealed with plastic film, classified in class 83, subclass 58.
  - B. Claims 14, drawn to a woodworking machine having a cartridge sealed with metal film, classified in class 83, subclass 58.
  - C. Claim 15-16, drawn to a woodworking machine having a braking pawl configured to move the brake into the blade, classified in class 83, subclass 58.
- 7. Inventions of Groups A-C are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the sealed cartridge with plastic film of Group A has separate utility such as it could be used without the braking pawl of Group C; and conversely, the braking pawl of Group C could be used without the plastically sealed cartridge of Group A. See MPEP § 806.05(d).
- 8. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

9. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
